

BSC 307 Unit Plan Assignment Part II

Now that you've decided what you're going to teach (Part I), you now need to determine how you are going to teach each concept and how you will assess student learning.

The Process...

1. For each objective, identify possible teaching strategies, make a final decision, and provide a rationale.
2. For each objective, identify possible assessment strategies, make a final decision, and provide a rationale.
3. Identify the laboratory skills that students will learn during this unit, related objectives, and the teaching strategy used to teach each one.
4. Identify the science literacy skills that students will learn during this unit, related objectives, and the teaching strategy used to teach each one.
5. Complete the Unit Plan Overview. In the "Notes" column, make sure to list anything special needs, such as computers, video, etc.
